Zitations-Styleguide IEEE

Zitatsionsregeln

Es folgen ein paar Regeln, wie Quellen im Fließtext einer Arbeit referenziert werden sollen. Nachfolgend wird dann erläutert, wie die Bibliografie, auf die sich diese Referenzen beziehen sollen, aufgebaut wird. Generell bietet sich an, für die Literaturarbeit BibTeX zu verwenden, das erleichtert das Einhalten dieser Regeln und die Verwaltung der Quellen enorm! Der folgende Auszug aus [1] gibt den Zitations-Stil des IEEE wieder, der hier als Maßstab festgesetzt werden soll:

"About this guide
This guide is an introduction to citing using the IEEE (Institute of Electrical and Electronic Engineers) Style.[…]

Style essentials
The IEEE Style is an *number* style with two key components:

1. **In-text** citations, which appear within the text
   (a citation number in a square bracket).
2. A **reference list**, at the end of the text
   (provides full details of all references cited in-text).

It is important to BE CONSISTENT when you are referencing. […]

Citation numbers are...

1. Arabic numbers assigned to each reference *as it is cited*.
   i.e. the first reference is assigned the number 1, the second is assigned the number 2 and so on.
2. Reused *each time that reference is cited*.
3. Identified by square brackets which are placed inside...
   - punctuation marks.
     eg "...was the most significant [4]."
   - colons and semicolons.
     eg "...had asserted [4]: further research..."
4. *Multiple references* - **do not use spaces**:
   - if *non-inclusive*: joined by commas.
     e.g. Though unlikely, the same effects was reported by [2,4,7,10]
   - if *inclusive numbers*: joined by hyphen.
     e.g. Motion or centrifugation can speed up the diagnosis of some viral infections [2-5]

Author-Name Substitution
Substitute reference numbers for the name of the author, whenever appropriate:

- As [1], [2], and [3] demonstrate, the natural course of microprocessor evolution will likely lead to computers with...
- According to [2], current Internet technology is still years behind industry projections...

Note Placement

Directly after the reference, rather than at the end of a clause or sentence. (Sometimes the reference will occur at the end of a clause or sentence):

- One study [2] examined the mRNA levels of Jun C, Jun B, and Jun D in mouse tissues.
- Current Internet technology is still years behind industry projections, one study suggested [2].

Multi-reference Citations
Separate citation numbers with commas and without any spaces:

- Though unlikely, the same effects was reported by [2,7,12].
- Motion or centrifugation can speed up the diagnosis of some viral infections [19-22]. “

Die Bibliografie

Im Fließtext werden also nur Referenzen in From von [Nummern] angegeben. In der Bibliografie werden diese Nummern mit Inhalt gefüllt, wobei auch dies nach bestimmten Regeln erfolgt. Diese stellen sicher, dass

- Die gegeben Informationen vollständig sind und man alles an der Hand hat, um das Zitat zu überprüfen
- Die Bibliografie ein einheitliches und optisch ansprechendes Layout hat, was das Auffinden von Informationen in kürzester Zeit unterstützt.

Wiederum folgen Regeln entsprechend dem IEEE Stil [2], getrennt nach gedruckten- und online vorhandenen Quellen, für die erweiterte Regeln gelten:

Regeln für gedruckte Ressourcen
“A numbered list of references must be provided at the end of the paper. The list should be arranged in the order of citation in text, not in alphabetical order. List only one reference per reference number. Each reference number should be enclosed by square brackets.

In text, citations of references may be given simply as “in [1] . . . ”, rather than as “in reference [1] . . . ”. Similarly, it is not necessary to mention the authors of a reference unless the mention is relevant to the text. It is almost never useful to give dates of references in text. […]

Footnotes or other words and phrases that are not part of the reference format do not belong on the reference list. Phrases such as “For example,” should not introduce references in the list, but should instead be given in parentheses in text, followed by the reference number, i.e., “For example, see [5].”

Sample correct formats for various types of references are as follows.

“The guidelines for citing electronic information as offered below are a modified illustration of the adaptation by the International Standards Organization (ISO) documentation system and the American Psychological Association (APA) style. Three pieces of information are required to complete each reference: 1) protocol or service; 2) location where the item is to be found; and 3) item to be retrieved. It is not necessary to repeat the protocol (i.e., http) in Web addresses after “Available” since that is stated in the URL.
